ISO Certifications to become World Class (Dr Kanak Madrecha) 20-5-2020

About ISO & ISO Standards: The International Organization for Standardization (ISO) develops international standards with inputs from all national standardization bodies and publishes these Standards on products & systems. Following are most popular ISOs i.e. Management System Standards with identification of organizational responsibility i.e. function/department for their certification.

ISO Certification Process: Typical stages involved for certification are: Development, Communication & Implementation of Management System, Desktop & Field Assessment for Initial Assessment/Certification by third party certification bodies & later regular Surveillance Assessment by them for next 3 years.

Benefits of ISO Certification: *Assurance of effective implementation of management systems which helps in becoming Approved/Qualified Suppliers for large & reputed organizations across the world.*
